Technical Profile

- C#
- PL/SQL - MS/SQL
- AWS S3
- Excel
- JS
- CSS
- HTML
- MS Office

Languages

Turkish (Native)

English (B2)

I've contributed to the development of a foundational online education system at Ecera System. Experienced in using tools like React.js, Git, and MongoDB in the MERN Stack, I work well with Agile methods, help define system needs, and focus on detailed documentation. Additionally, I bring hands-on expertise as a Software Engineer in an electricity distribution company, specializing in debugging and SQL query development.

Work History

2021-11 - 2022-05

Associate Software Engineer

Ecera System, Michigan 48073, United State of America · Remote

- Created a user-friendly front end using React.js.
- Collaborated with a team using Git for development.
- Designed and implemented a database with MongoDB.
- Followed an Agile approach for project development.
- Documented project details for future reference.

Skills: React.js · Git · MongoDB · MERN Stack

2022-06 - 2022-11

Software Engineer

Meram Electricity Distribution Co., Konya

- Performed debugging to reduce errors and improve system performance.
- Created SQL queries for report generation
- Worked closely with teams to ensure clear communication and efficient project delivery.

Skills: C#, PL/SQL, JS, Python

Education

2015-07 - 2019-07

Bachelor of Science: Computer Engineering

KTO Karatay University - Konya
